

BASITH MOHAMMED ALI

Penetration Tester | SOC Analyst | Security Researcher
India | +91 9746132665 | basithmohammedali7@gmail.com
LinkedIn | GitHub | Medium

Professional Summary

Cybersecurity Researcher with hands-on experience in Web Application Penetration Testing, Active Directory Security, Mobile Application Testing, SIEM, SOAR and threat detection through enterprise-style home labs. Experienced building automated SOC workflows using Elastic Stack, Shuffle SOAR, VirusTotal and TheHive.

Technical Skills

Web Application: OWASP Top 10, SQLi, XSS, IDOR, JWT, CSRF, SSRF, SSTI, NoSQL Injection

Network: Enumeration, Scanning, Packet Analysis, MITM

Active Directory: Kerberoasting, AS-REP Roasting, BloodHound, Pass-the-Hash, SMB Relay, LLMNR, Golden Ticket

SIEM/SOAR: Elastic Stack, Fleet, Splunk, Wazuh, Shuffle, TheHive, VirusTotal

Programming & Scripting: Python, Bash

Tools

- | | | | |
|--------------|-----------|--------------|---------------|
| • Nmap | • SQLMap | • BloodHound | • FFUF |
| • Burp Suite | • Nessus | • Impacket | • LinPEAS |
| • Wireshark | • Hydra | • Kerbrute | • WinPEAS |
| • Metasploit | • Nikto | • Rubeus | • Hashcat |
| • Nuclei | • NetExec | • Mimikatz | • Feroxbuster |

Professional Experience

Cybersecurity Intern

Jun 2026 – Jul 2026

Hackware Security Solutions

- Performed Web Application, Network, Mobile Application and Active Directory penetration testing.
- Prepared professional security assessment reports with remediation recommendations.

Cybersecurity Projects

SOC Automation – Elastic SIEM, Shuffle SOAR, VirusTotal & TheHive

- Built an enterprise-style SOC lab integrating Elastic SIEM, Fleet, Active Directory, Mythic C2, osTicket, and Kali Linux.
- Automated alert enrichment, case creation, and incident response workflows using Shuffle SOAR, VirusTotal, and TheHive.
- Simulated real-world attacks to validate detections and improve SOC investigation workflows.

Splunk SIEM Home Lab – Threat Detection

- Deployed Splunk to centralize and analyze security logs from multiple systems.
- Developed dashboards and detection rules for brute-force, reconnaissance, and authentication attacks.
- Tuned alerts and investigated events using SPL to reduce false positives.

Wazuh EDR Deployment

- Configured Wazuh on Windows and Linux endpoints for centralized endpoint monitoring.
- Detected privilege escalation, suspicious processes, and file integrity changes.
- Correlated endpoint telemetry to support security investigations and incident response.

Active Directory Attack Lab

- Built an Active Directory lab to simulate enterprise attack and defense scenarios.
- Performed Kerberoasting, AS-REP Roasting, Pass-the-Hash, SMB Relay, LLMNR, and Golden Ticket attacks.
- Conducted enumeration and post-exploitation using BloodHound, Impacket, Rubeus, NetExec, and Mimikatz.

Education

Bachelor of Computer Applications (BCA)

Yenepoya University

2025–Present

Certifications

CompTIA Security+

(In Progress)
